Review: Angles and angle measure

1

a Acute angle **b** Right angle **c** Right angle **d** Acute angle

e Acute angle **f** Acute angle **g** Straight angle **h** Obtuse angle

i Acute angle **j** Straight angle **k** Acute angle **l** Obtuse angle

m Obtuse angle

2 $\angle CBA$

3

a $\angle SPT$ and $\angle SQR$ **b** $\angle DCB$ and $\angle DAB$

4 **Diagram 1**

5 $x = 152$

6

a $x = 8$

b 47°

7 $\overrightarrow{FB}$ and $\overrightarrow{FE}$

8 $\overrightarrow{DA}$ and $\overrightarrow{EC}$

9 $\overrightarrow{DA}$ and $\overrightarrow{DE}$

10

a

i Point S

ii $\overrightarrow{ST}$ and $\overrightarrow{SR}$

b

i Point Q

ii $\overrightarrow{QR}$ and $\overrightarrow{QP}$

11

a Acute **b** Acute **c** Right **d** Obtuse

e Obtuse **f** Straight

Additional questions

12

a $\angle PQR$, $\angle RQP$, and $\angle Q$

b $\angle XYZ$, $\angle ZYX$, and $\angle Y$

13

a 50°

Acute

b 160°

Obtuse

14

a $m\angle BJK = 125^\circ$

b $m\angle KLM = 90^\circ$

15

a $\angle AGB \cong \angle EGD$ and $\angle AGF \cong \angle DGC$ and, although not labeled, $\angle EGF \cong \angle BGC$

b $\angle JZH \cong \angle FZG$ and $\angle JZF \cong \angle HZG$, and $\angle AZH \cong \angle AZF$. Answer can include any two pairs.

16

a $m\angle AEB = 50^\circ$

b $m\angle AED = 160^\circ$

c $m\angle CED = 55^\circ$

d $m\angle DEB = 110^\circ$

17

a $\angle ABC$ is a figure and cannot be equal to a value. Correct statement: $m\angle ABC = 90^\circ$

b The middle point in an angle name is the vertex. Correct statement: The vertex is Z.

c Obtuse angles measure between 90° and 180°. Correct statement: 180° is a straight angle.

18 125°

19 Josiah assumed that the angle in the picture was equal to 90 degrees, but the angle has not been labeled in any way that shows it is a right angle.
