Additional questions

8 The shape itself does not change. The shape is flipped across the x-axis, making all of y-coordinates negative.

9

a No **b** Yes **c** No **d** Yes

10 Point F

11 There exists a line of symmetry in the figure where one half of the image can be reflected on

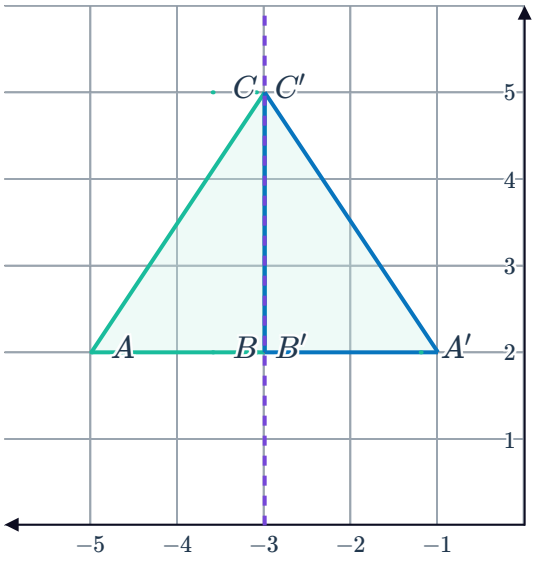

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

to the other. For example:

17 $B\,(-7, 3)$

18

a True **b** False **c** True **d** False

e True

19

a Yes. Sokayna's triangle is Roly's triangle reflected over the line $y = x$.

b No, both triangles have the same perimenter. This is because reflections do not change the size of a shape.
