Applications

1 Round the following to the nearest cent:

a $\$34.7691$ **b** $\$64.4725$ **c** $\$254.899$ **d** $\$32.455$

2 Round the following to the nearest five cents:

a $\$27.82$ **b** $\$64.86$ **c** $\$34.89$ **d** $\$57.54$

e $\$227.02$ **f** $\$634.67$ **g** $\$1024.98$ **h** $\$21.94$

3 Harry buys an item from the school canteen for $\$3.20$. If he pays for it with a five dollar note, how much change will he get back?

4 A customer gives the cashier $\$100$ to pay for a purchase of $\$64.95$. How much change should the cashier give the customer?

5 Amy is buying some supplies for the new school year. She buys an exercise book for $\$9.55$, a pack of pens for $\$6.12$ and a pencil case for $\$6.28$. How much does she spend in total?

6 A calculator is 15.9 cm long.

a How far will 30 calculators reach if laid end to end?

b Convert this length to metres.

7 Lisa purchased a car and is paying monthly installments of $\$148.40$ to pay it off. If it takes her 60 months to pay it off, how much will she have spent on car repayments in total?

8 James used a calculator to evaluate 3.179×3.96 but forgot to enter the decimal points. The answer he got was $1\,258\,884$. What should the answer have been?

9 If Skye earns $\$238.42$ for working 7 hours, how much does she earn per hour?

10 Three items weighing 1.22 kg, 4.66 kg and 2.77 kg are to be posted but are found to be over the 8.11 kg limit. By how much does the total weight exceed the limit?

11 A piece of timber 3.32 m long is cut evenly into smaller pieces each measuring 0.04 m. How many of these pieces can be cut?

12 Quentin recorded the following times in the $100\ \text{m}$ running race over a whole season.

How much quicker was his fastest time than his slowest time?

Race	Time (seconds)
1	10.59
2	11.03
3	10.45
4	10.38
5	10.63

13 How many $0.38\ \text{L}$ bottles can be filled from a barrel which holds $41.8\ \text{L}$?

14 How much would you pay for eight t-shirts if they cost $\$46.88$ each, and you receive a discount of $\$9.47$?

15 Neville trains six days a week. Each weekday, he runs $2.4\ \text{km}$ and on Saturday, he runs $4.6\ \text{km}$. How far does he run in a whole week?

16 At midnight, the temperature in Darwin is 29.6°C. Each hour after that the temperature decreases by 2.34°C until the sun comes up. Find the temperature at 4 am.

17 Pauline is making 5 chocolate coated strawberries for her friends. She has $52.5\ \text{g}$ of chocolate which she uses to evenly coat the strawberries.

a One of the strawberries has a mass of $19\ \text{g}$. Choose the most reasonable estimate for its mass once it is coated in chocolate:

A $29\ \text{g}$ **B** $69\ \text{g}$ **C** $9\ \text{g}$ **D** $10\ \text{g}$

b Calculate the exact mass of the $19\ \text{g}$ strawberry after it is coated in chocolate.

18 William earns $\$304.92$ for 5 days of work.

a Choose the most reasonable estimate for how much William earns per day:

A $\$6.10$ **B** $\$610.00$ **C** $\$61.00$ **D** $\$152.50$

b Calculate how much William earns each day.
