Additional questions

- 8 The shape itself does not change. The shape is flipped across the x -axis, making all of y -coordinates negative.

9

a No

b Yes

c No

d Yes

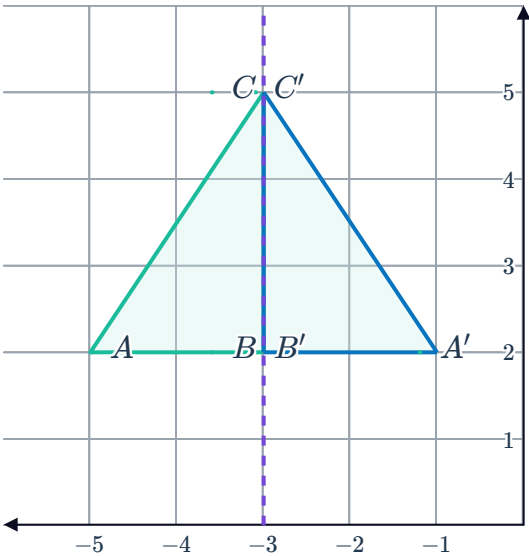

10 Point F

to the other. For example:

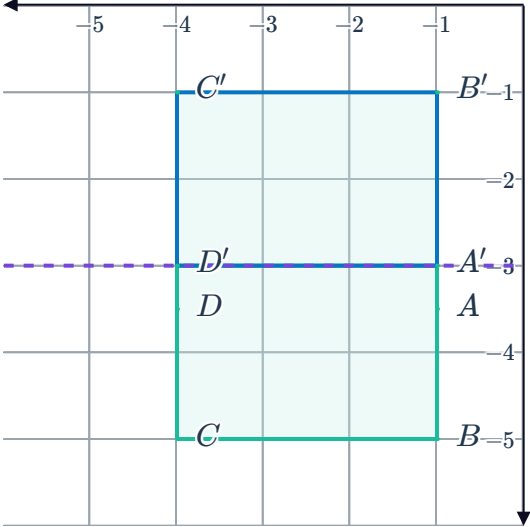

12

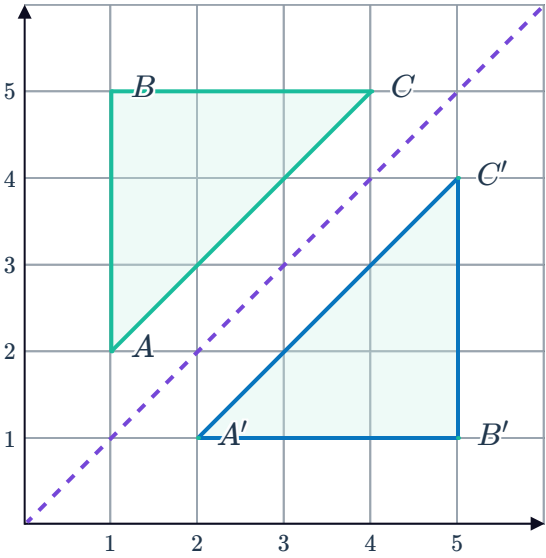

a

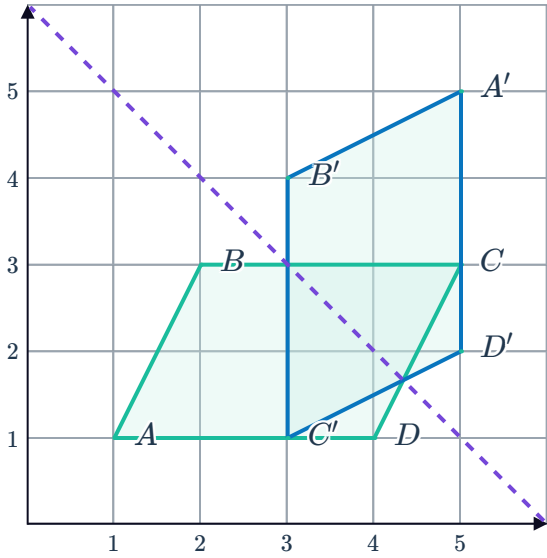

b

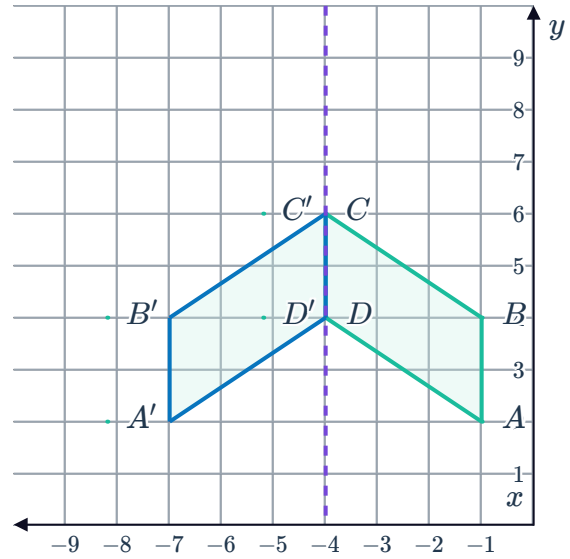

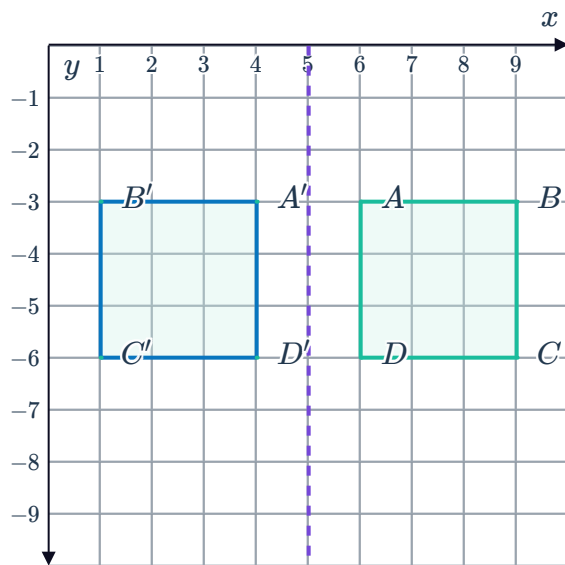

c

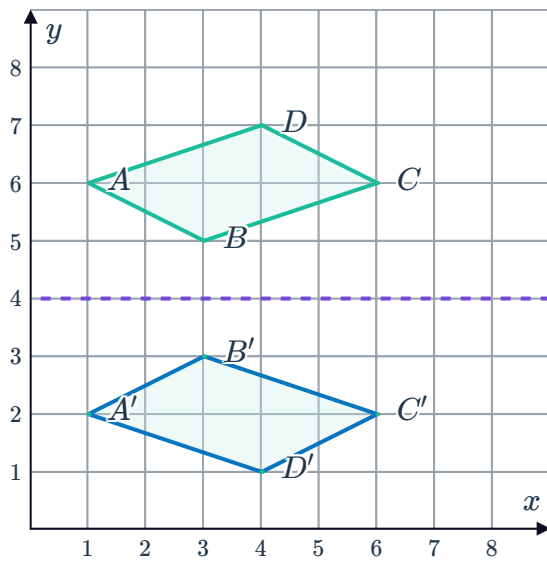

d

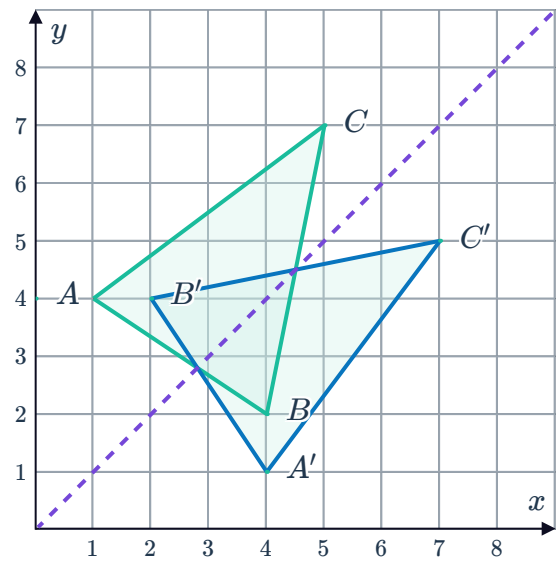

13 a

c

d

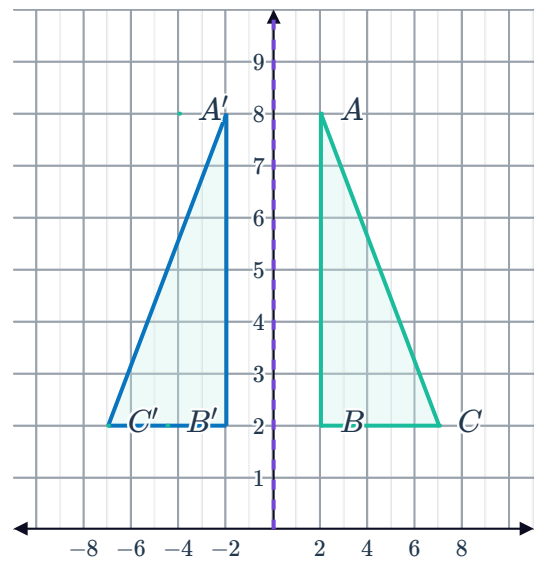

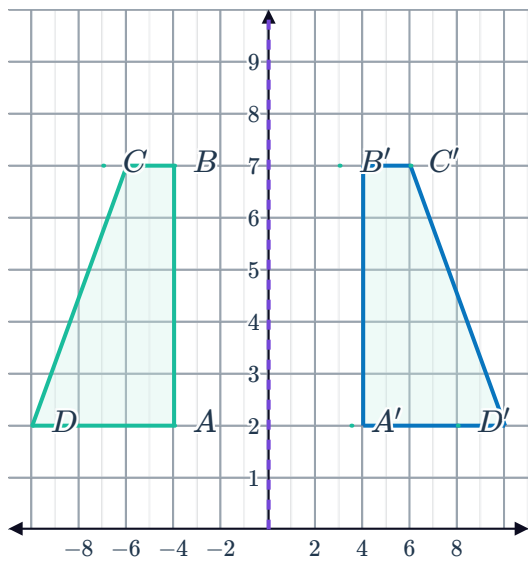

14

a Reflection across the x -axis.

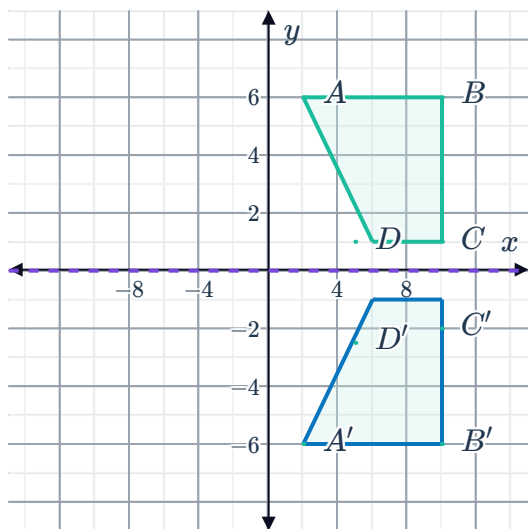

b Reflection across the y -axis.

f

16

a $N(-5, 6)$

b 10 units

17 $B(-7, 3)$

18

a True

b False

c True

d False

e True

19

a Yes. Sokayna's triangle is Roly's triangle reflected over the line $y = x$.

b No, both triangles have the same perimeter. This is because reflections do not change the size of a shape.
