

Power functions

1

a Odd

b Even

c Even

d Odd

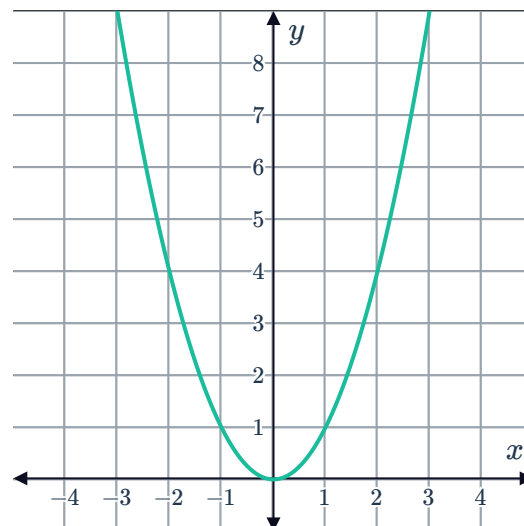

e Odd

2

a

x	-3	-2	-1	0	1	2	3
y	9	4	1	0	1	4	9

b

c No

e 0

d $x = 0$

f 2

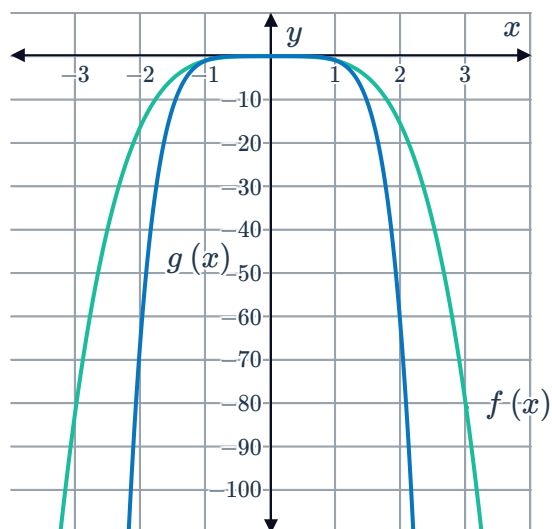

3

a Fall

b Rise

4

a

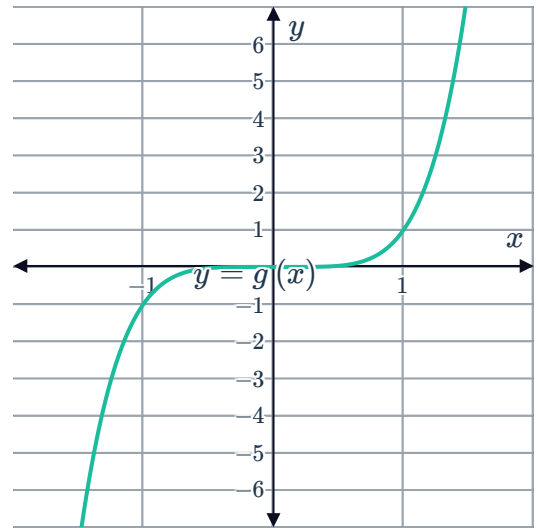

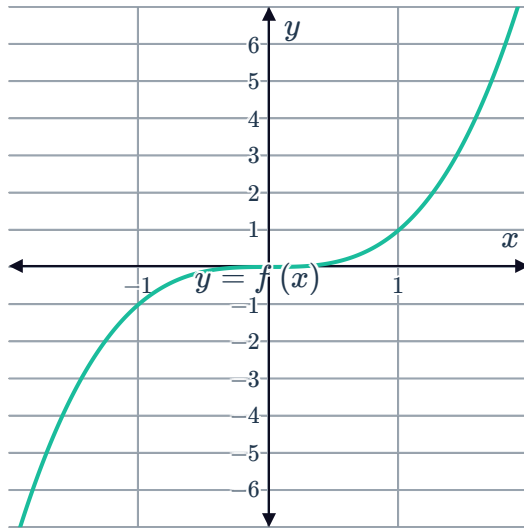

b $g(x) = -x^6$

5

a

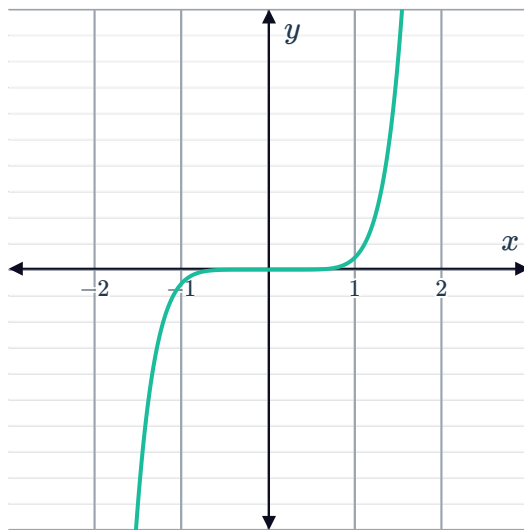

- b $y = x^7$ would have the flattest gradient close to the origin, and the steepest gradient away from the origin.

6

- a They approach positive infinity.

c

- b They approach negative infinity.

d
