

Perimeter of compound shapes

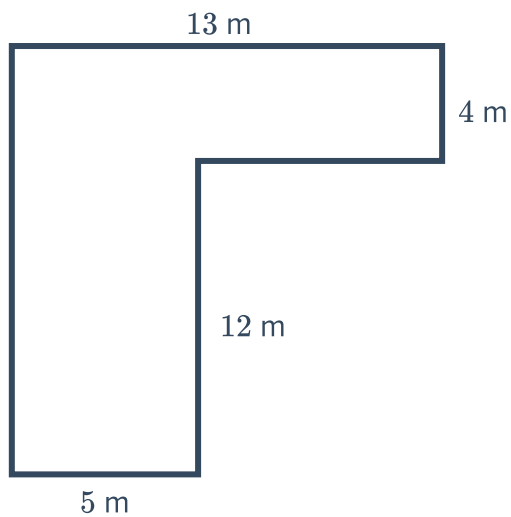

1 For each of the following compound shapes:

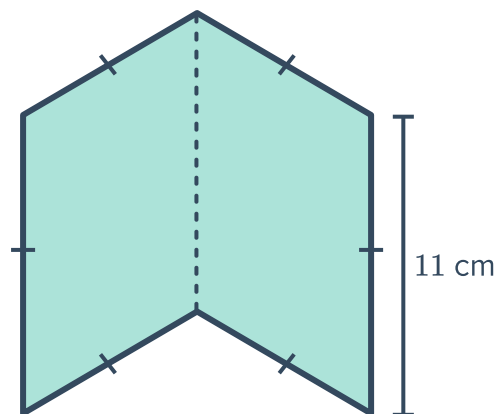

i State the basic shapes that make up the compound shape.

ii Find the perimeter.

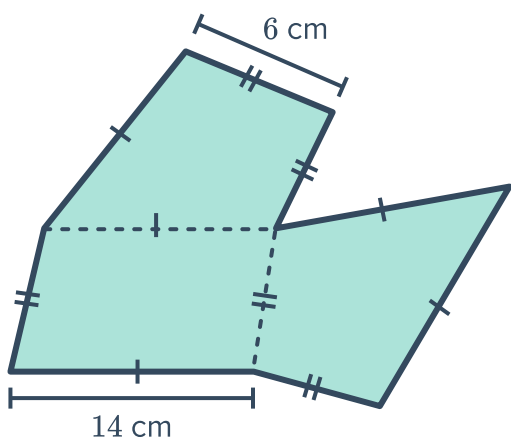

a

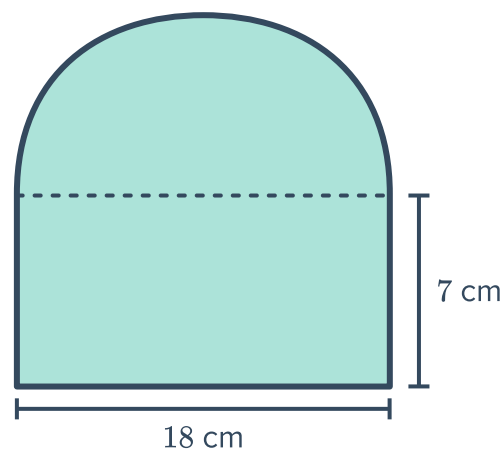

b

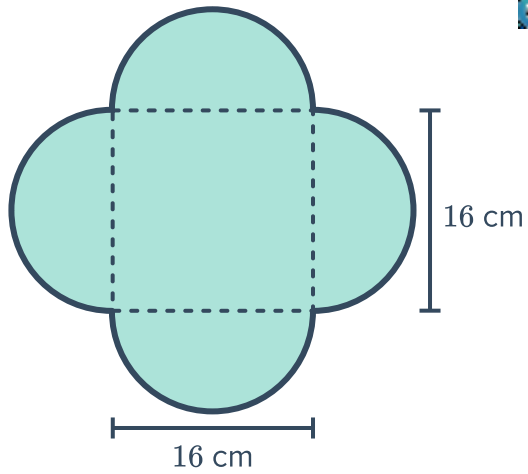

c

d

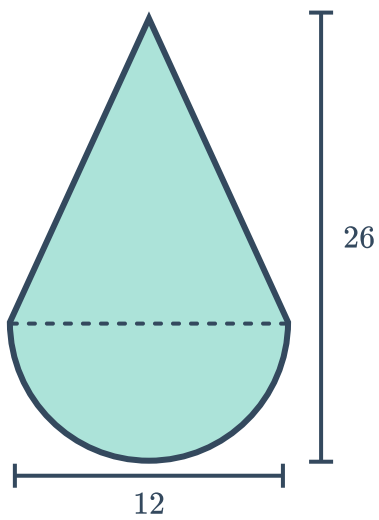

e

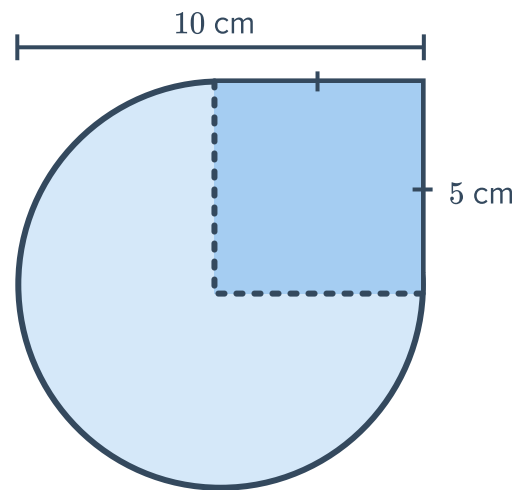

2 Find the perimeter of the following compound shapes, to two decimal places:

a

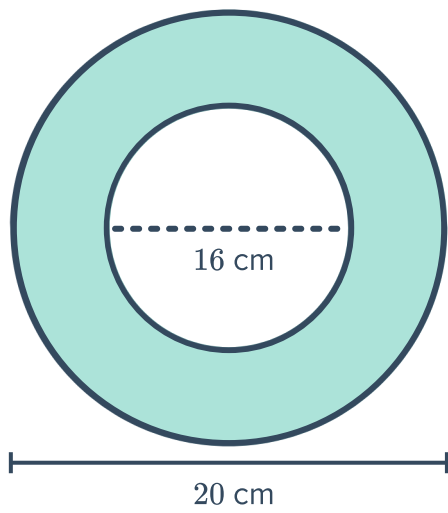

b

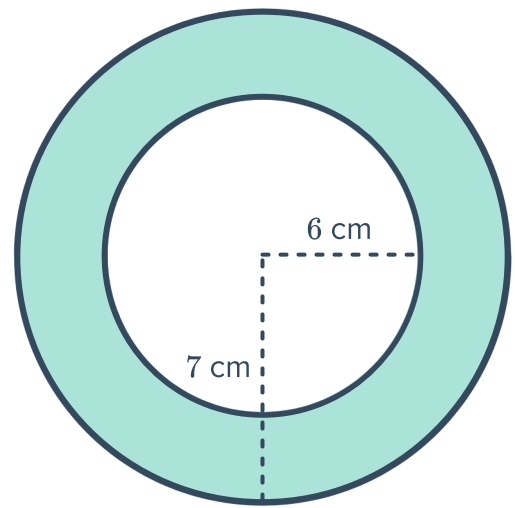

Area of compound shapes

3 Find the shaded area in the following figures, correct to one decimal place:

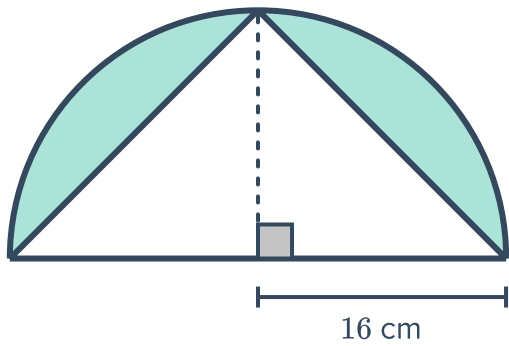

a

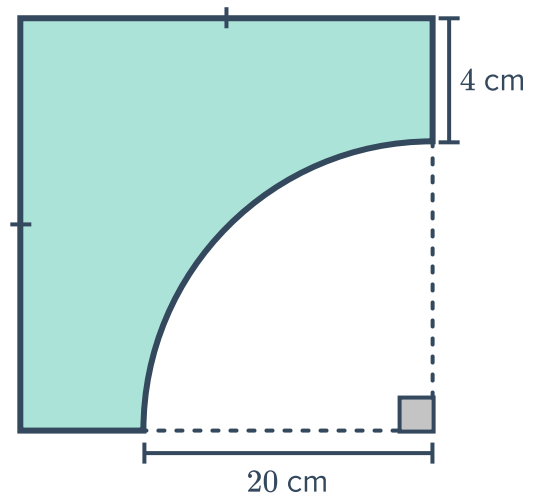

b

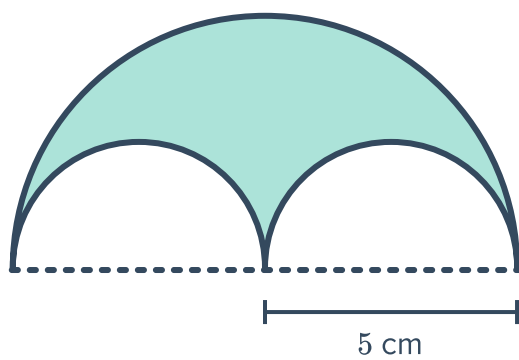

c

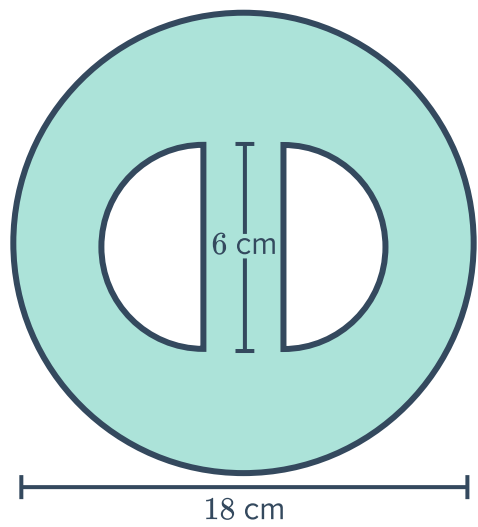

d

e

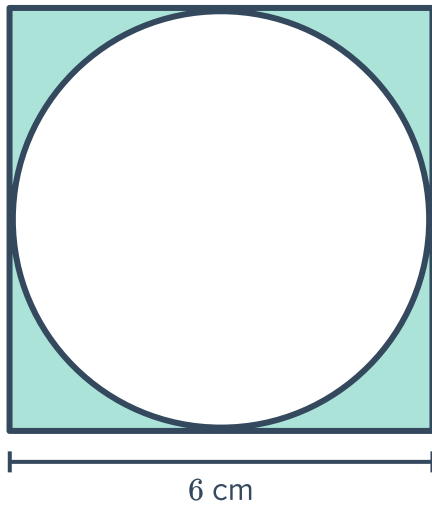

f

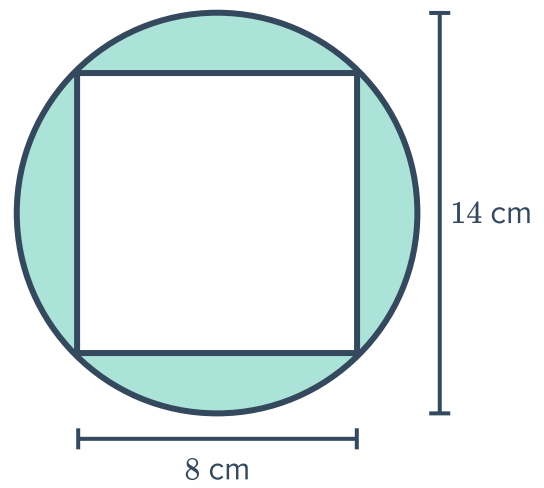

4 Find the exact shaded area of the following figures:

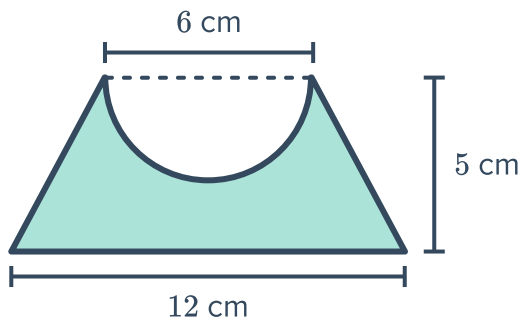

a

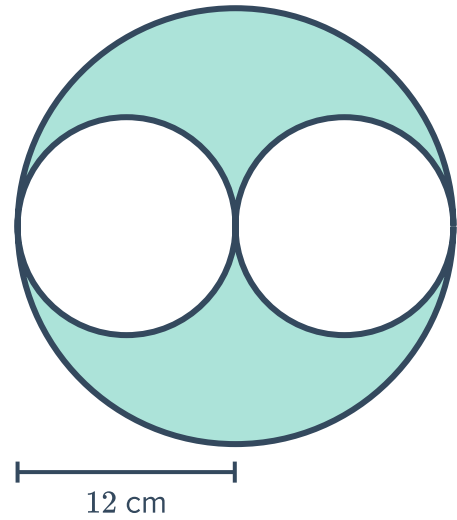

b

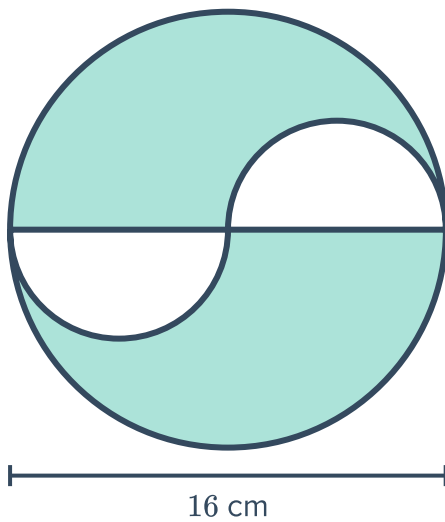

c

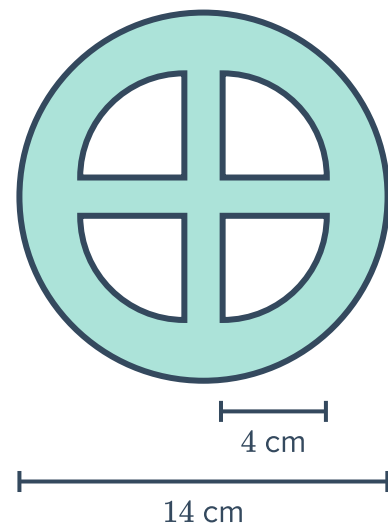

d

e

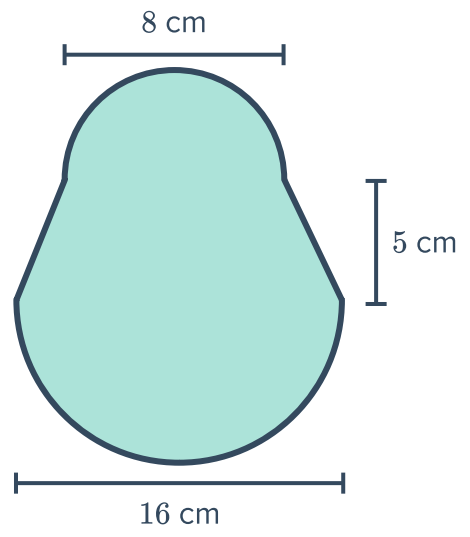

f

5 For the compound shape shown:

- State the basic shapes that make up the compound shape.
- Find the exact area.

Applications

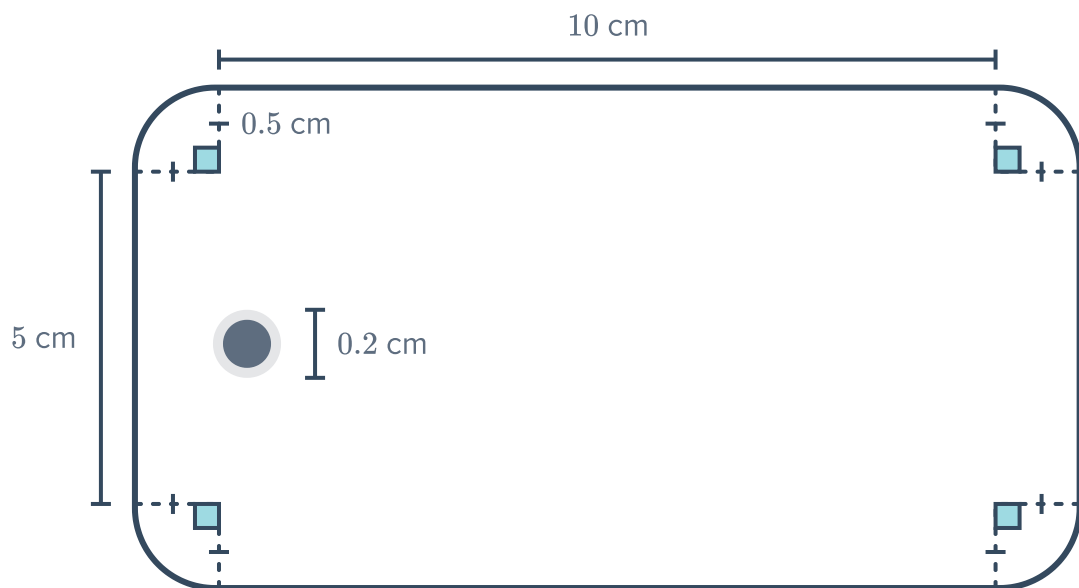

- 6 Tricia is drawing a yin-yang symbol. She chooses to make the radius of the overall circle be 16 cm and the radius of the small circles be 2 cm:

Find the area of the shaded part of the symbol.

Round your answer to two decimal places.

- 7 The back cover of a mobile phone is shown in the following diagram. The rounded corners are quadrants:

Find the area of the back cover, excluding the circular camera lens. Round your answer to two decimal places.
