

Gradient function graphs

1

- a 1
- b 1
- c A linear function has a constant gradient.

2

- a The gradient function is positive when $y = x^2$ is increasing, and negative when $y = x^2$ is decreasing.
- b Positive
- c The gradient of the tangent line increases at a constant rate.
- d Negative
- e The gradient of the tangent line increases at a constant rate.
- f Linear

3

- a Positive
- b The gradient of the tangent line increases at an increasing rate.
- c Positive
- d The gradient of the tangent line decreases at an decreasing rate.
- e Quadratic

4

- a Positive
- b The gradient of the tangent line increases at an increasing rate.
- c Negative
- d The gradient of the tangent line increases at a decreasing rate.
- e Cubic

5

a

b

c Odd

d Even

Algebraic differentiation

6

a

i Degree 1

ii Degree 2

iii Degree 3

b $n - 1$

7

a

$$\frac{dy}{dx} = 7x^6$$

b

$$\frac{dy}{dx} = 9x^8$$

c

$$\frac{dy}{dx} = 5x^4$$

d

$$\frac{dy}{dx} = 0$$

Applications

8

$$f'(2) = 32$$

9

a 9

$$b \quad y = 9x - 8$$

10

a

Graph	y -intercept of the tangent line	Gradient of the tangent
$y = x^2$	$(0, -1)$	2
$y = x^3$	$(0, -2)$	3
$y = x^4$	$(0, -3)$	4
$y = x^5$	$(0, -4)$	5

b n c No, because then the gradient of the tangent at $x = 1$ would be 1.

11

a False

b True

c False

d True
