

Numerical equations

- 1 What is an equation?
- 2 State whether the following equations are true or false:

a $22 + 6 = 4 \times 7$

c $5 \times 8 - 27 = 19$

e $8 + 16 = 6 \times 4$

g $5 \times 7 - 19 = 13$

i $55 - 24 = 7 \times 3$

k $3 \times 6 + 7 = 32 - 8$

b $51 - 6 = 18 + 4 \times 8$

d $\frac{96}{8} = 106 - 94$

f $57 - 4 = 15 + 6 \times 7$

h $\frac{36}{6} = 52 - 46$

j $32 + 8 = 20 + 4 \times 6$

l $\frac{28}{4} + 7 = 30 - 16$

Equations involving unknown values

- 3 Fill in the blank to make the following equations true:

a $4 + \square = 8$

c $8 \times \square = 35 - 3$

e $8 + \square = 17$

g $4 \times \square = 27 - 3$

i $\square + 18 = 35$

k $\square \times 8 = 42 - 10$

b $3 \times \square = 30$

d $\square \div 3 = 9 - 6$

f $8 \times \square = 88$

h $\square \div 6 = 9 - 3$

j $\square \times 11 = 77$

l $36 \div \square = 15 - 6$

- 4 Consider the equation $3x + 8 = 23$.

- a Find the value of each expression:

i $3 \times 1 + 8$

ii $3 \times 2 + 8$

iii $3 \times 7 + 8$

iv $3 \times 6 + 8$

v $3 \times 5 + 8$

- b Use your answers from part (a) to solve the equation $3x + 8 = 23$.

- 5 Find the value of the variable that will make the following equations true:

a $x + 18 = 30$

b $8x = 96$

c $28 - x = 21$

d $\frac{x}{9} = 3$

e $12 + m = 25$

f $s - 7 = 14$

g $11u = 66$

h $\frac{m}{12} = 4$

Word problems

6 For each of the following word sentences, write a matching equation:

- a The quotient of g and seven is equal to eleven.
- b The product of seven and y is equal to x less than twenty five.
- c The product of eight and s is taken away from sixty six. The result is equal to ten.
- d Sixteen less than m is equal to twenty six.
- e Twelve less than q is equal to twenty five.
- f The product of twelve and r is taken away from seventy two. The result is equal to thirty six.
- g The quotient of p and ten is equal to seven.
- h The product of five and q is equal to p less than twenty nine.

7 For each of the following equations, write a matching word sentence:

a $8x = 32$

b $\frac{63}{x} = 9$

c $6x + 4 = 60 - 20$

d $5y = 60$

e $\frac{72}{p} = 8$

f $8x + 7 = 72 - 25$
