

Symmetry

- 1 Consider all the single digit numbers shown below.
Which of these numbers have line symmetry?

1 2 3 4 5 6 7 8 9 0

- 2 How many lines of symmetry do the following shapes have?

a

b

c

d

e

g

h

- 3 Consider the $\triangle RPQ$ shown. The triangle is reflected across $\overline{PQ}$. Identify the shape formed by the triangle and its reflection.

- 4 Consider the following rhombus.
The points B, D, F and H represent the midpoints of the sides of the rhombus.
Write down the pairs of points that can be joined to form a line of symmetry for the rhombus.

- 5 Consider the following rectangle.
The points F, G, H and E represent the midpoints of the sides of the rectangle.
Write down the pairs of points that can be joined to form a line of symmetry for the rectangle.

- 6 Consider the following parallelogram.
The points B, F, H and d represent the midpoints of the sides of the parallelogram.
Write down the pairs of points that can be joined to form a line of symmetry for the parallelogram.

- 7 The following shape is constructed from five identical rhombuses. How many lines of symmetry does this shape have?

- 8 Determine whether the following diagrams have rotational symmetry.

a

b

c

d

e

f

g

h

i

j

k

l

m

n

9 Determine whether the following letters have rotational symmetry.

a

b

c

d

e

10 State the order of rotational symmetry for the following shapes.

a

b

c

d

e

f

g

i

j

11 State the type(s) of symmetry each of the following diagrams have.

a

b

c

e

f

12 If a shape has a rotational symmetry of order 2, state the size of each angle of rotation.

13 Do all isosceles triangles have rotational symmetry?

14 Do the following road signs have rotational symmetry?

a

b

15 Consider the road sign shown.

- a State the order of rotational symmetry.
- b Does the road sign have line symmetry?

16 Dave wants to get a heavy rectangular box from point A to point B by repeatedly turning it over. The width of the box is 30 cm and its length is twice its width.

- a The diagram shows the distance travelled after the first and second turn. After 3 turns, what distance along the ground has been covered starting from point A ?
- b If the distance from point A to point B is 1620 cm, how many times must the box be turned?

Additional questions

17 Determine whether the following shapes have rotational symmetry:

a

b

c

d

18 If a shape has a rotational symmetry of order 4, state the size of each angle of rotation.

19 Do all equilateral triangles have rotational symmetry?
