

Compound shapes

1 For each of the following figures:

- Find the area of rectangle B.
- Find the total area of the compound shape.

a

b

2 For the following compound shape:

- Find the area of rectangle A.
- Find the total area of the given shape.

3 Find the area of the following compound shapes:

a

b

c

d

e

f

g

h

i

j

k

l

m

n

o

- 4 The quadrilateral in the diagram has a diagonal measuring 14 m. Calculate the total area of the quadrilateral.

5 For each of the following compound shapes

- i State the basic shapes that make up the compound shape.
- ii Find the perimeter.

a

b

c

Holes and cutaways

6 Consider the following figures, where all measurements are in centimetres:

- Figure 1:

- Figure 2:

- Figure 3:

- Figure 4:

- Find the area of the entire rectangle shaded as shown in figure 1.
- Find the area of the interior rectangle shaded as shown in figure 2.
- Find the area of the corner rectangle shaded as shown in figure 3.
- Hence, calculate the area of the shaded region as shown in figure 4.

7 Consider the following figures:

• Figure 1:

• Figure 2:

- Find the area of the shaded rectangle as shown in figure 1.
- Find the area of the shaded triangle as shown in figure 2.
- Hence, find the area of the shaded region as shown in figure 3.

• Figure 3:

8 Find the area of the shaded region in the the following figures:

a

b

c

d

e

f

9 Consider the following figure:

- Find the value of x .
- Find the area of the shaded region.

10 For each of the following figures:

- i Find the value of x .
- ii Find the value of y .
- iii Calculate the area of the shaded region.

a

b

11 Find the area of the shaded region in the following figures:

a

b

Applications

- 12** Katrina has a garden bed that is shaped as shown in the following figure:

Find the area of the garden bed.

- 13** Lachlan draws the plot of land which contains his house and garden.

- a** Find the total area of the plot of land.
- b** Find the area covered by the house.

- 14** The dining room floor shown is to be tiled with slate tiles. The cost of tiling the room is \$10 per square metre.

- a** Calculate the area to be tiled.
- b** How much will it cost to tile the room?

- 15 A piece of paper in the shape of a parallelogram is folded along its shortest diagonal, as shown. Find the total area covered by the folded paper.

- 16 A farmer is going to fertilise his paddock, which has the following shape:
- Find the area of the paddock.
 - If it takes 150 kg of fertiliser to fertilise 100 square metres, how many kilograms of fertiliser should the farmer purchase?
