11 Example answer:
Sampling within each class is self selected.

Sampling and measurement errors

12

a The sample does not adequately represent the population.

b The sample does not adequately represent the population.

c The sample does not adequately represent the population.

d The sample is too small.

13 Neither

14

a Example answer:
Those who bought the book do not represent the whole population.

b Example answer:
This question holds an assumption.

15

a Example answers:

- This is an assumption based question.
- Poor or leading question wording.

b Example answers:

- Poor or leading question wording.
- The scale provided is inadequate.

16

a The sample does not adequately represent the population.

b It is an assumption based question.

17 Example answers:

- The sample does not adequately represent the population of parents in America as only parents at one brand of daycare have been surveyed.
- The sample may be too small, it is possible there are only a few such daycare centers around America.
- The survey only asks parents of children in the age group attending daycare.
- This type of daycare may be more expensive, so the parents may be more likely to prefer private schools.
