Extension: Chords of a circle

1 Find x for the following diagram with C as the center of a circle:

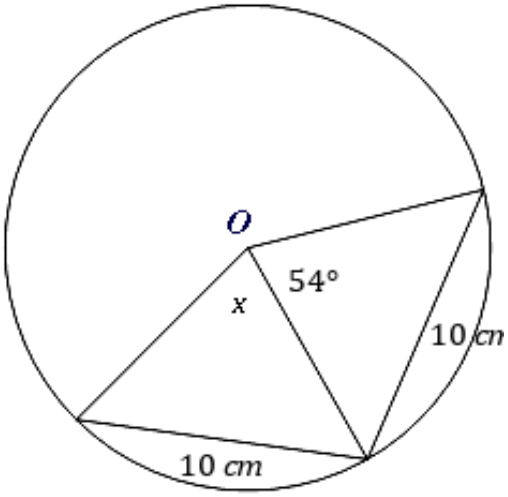

2 Find x for each of the following diagrams with O as the center of the circles:

a

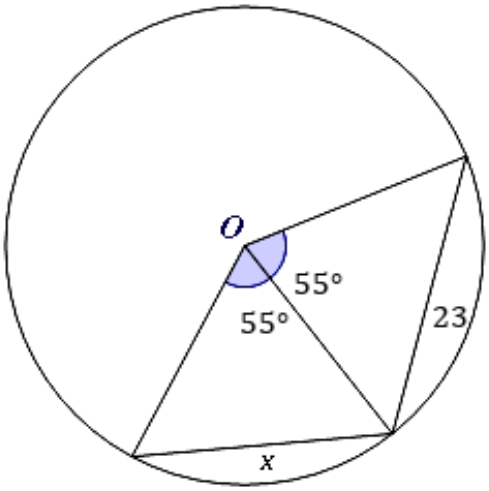

b

4 In the diagram, O is the center of a circle with $m\angle AOB = 33^\circ$ and $m\angle COD = x$. Find x.

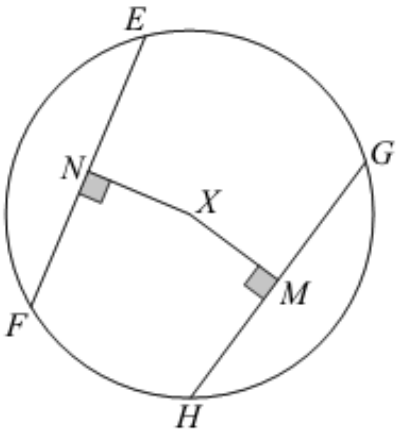

5 In the diagram, O is the center of a circle with $OC = 6$, $CP = 19$ and $AB = 26$.

a Find the radius OA. Give your answer as an exact value in radical form.

b Find the radius PB. Give your answer as an exact value in radical form.

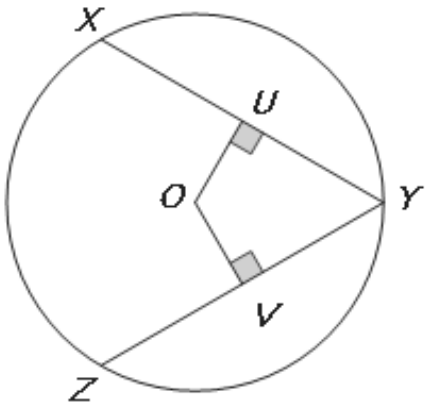

6 In the diagram, X is the center of a circle with $EF = GH$ and $XM = 9$ cm. Find XN.

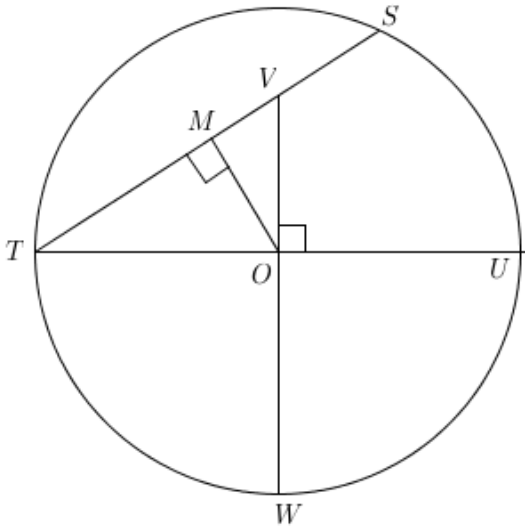

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

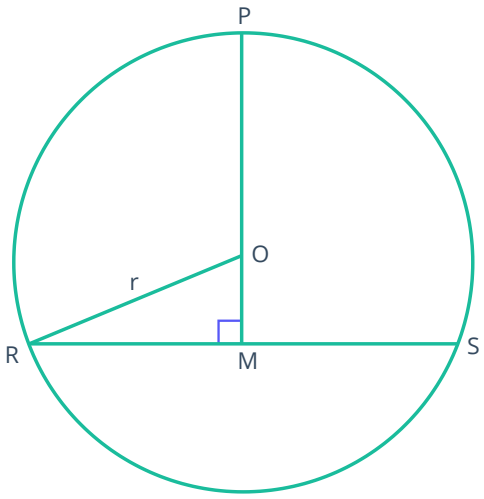

7 In the diagram, O is the center of a circle with $OU = OV$, and $XY = 19$ cm.
Find YZ.

8 In the diagram, O is the center of a circle with $TU = 150$ cm, $VW = 131.25$ cm and $OM = 45$ cm.
Find SV.

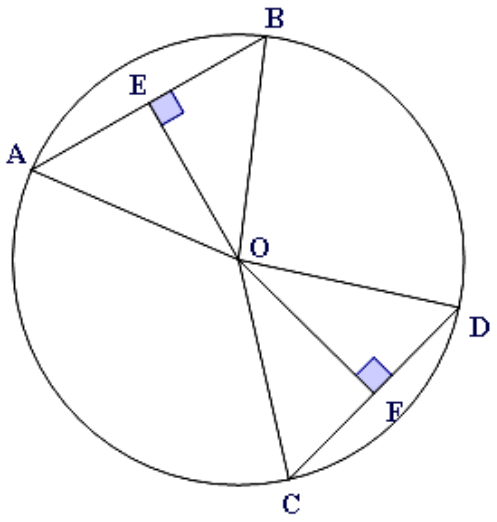

9 The diagram shows a circle with center O and $\overline{RS} \perp \overline{OM}$. The length of the chord $\overline{RS}$ is 16 cm and $\overline{OM}$ is 15 cm.
Find the length of the radius.

10 In the following diagram, O is the center of a circle with $AB = CD$ and $m\angle OEB = m\angle OFD = 90^\circ$.
Prove that $\triangle ABO \cong \triangle CDO$.

11 In the given diagram, O is the center of a circle with $\overline{OC} \perp \overline{AB}$.
Prove that $\triangle OAC \cong \triangle OBC$.

12 The diagram shows O as the center of the circle and $\angle AOB \cong \angle DOC$.
Prove that $\overline{AB} \cong \overline{DC}$.

13 Consider the following circle of center O with $\overline{AB} \parallel \overline{ED}$.
Prove that $\triangle ABO \cong \triangle DEO$.

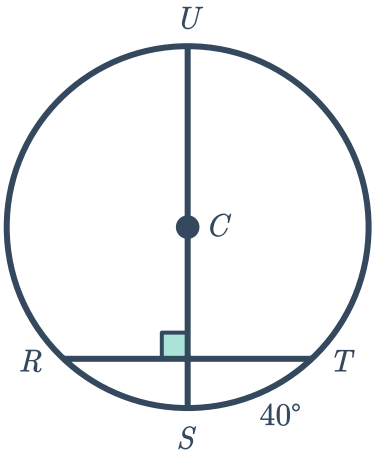

Additional questions

14

a Solve for x

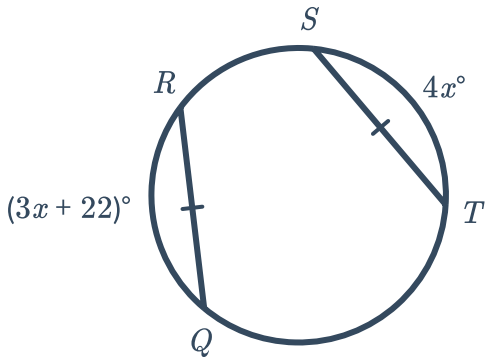

b Solve for $m\overset{\frown}{RS}$

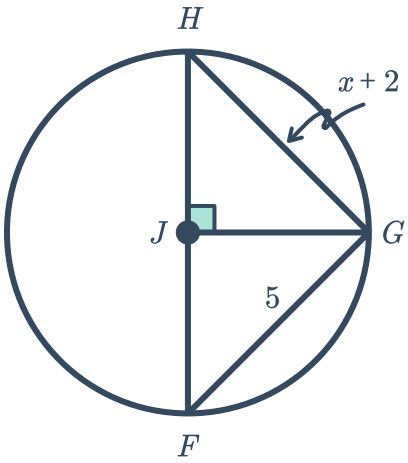

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

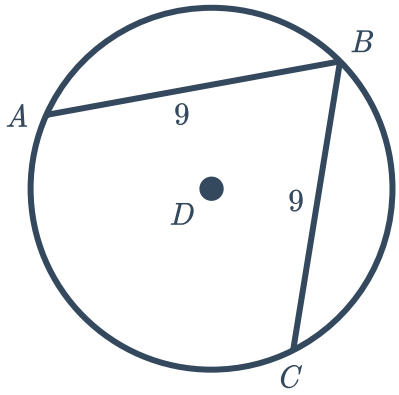

c Solve for $m\overset{\frown}{RQ}$

d Solve for x

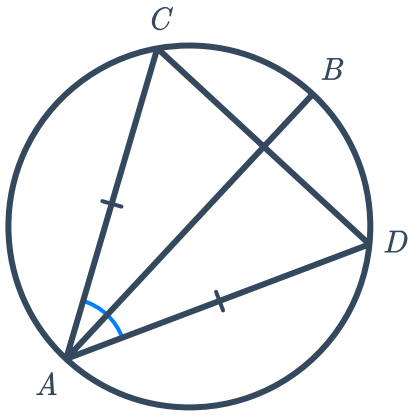

15 If $m\overset{\frown}{AB} = 118^\circ$, solve for $m\overset{\frown}{BC}$.

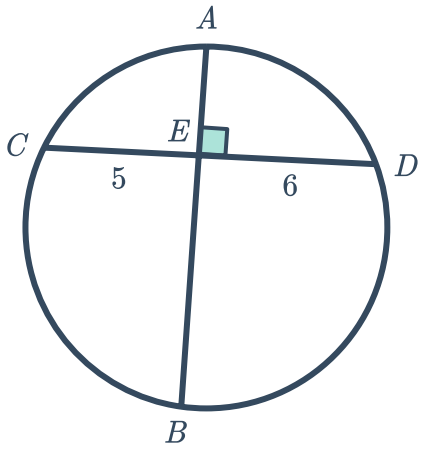

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

16 Based on the information given in the diagram, determine whether each of the following statements is true or false:

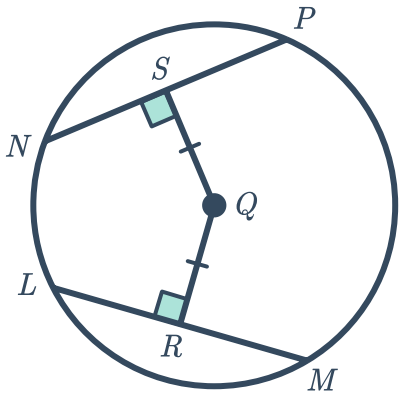

a $\overset{\frown}{AC} \cong \overset{\frown}{AD}$

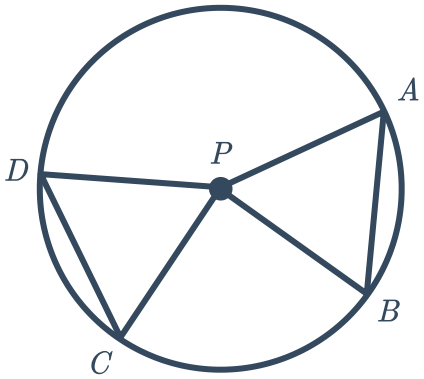

b $\overset{\frown}{AC} \cong \overset{\frown}{AD}$

c $\overline{QS} \cong \overline{SP}$

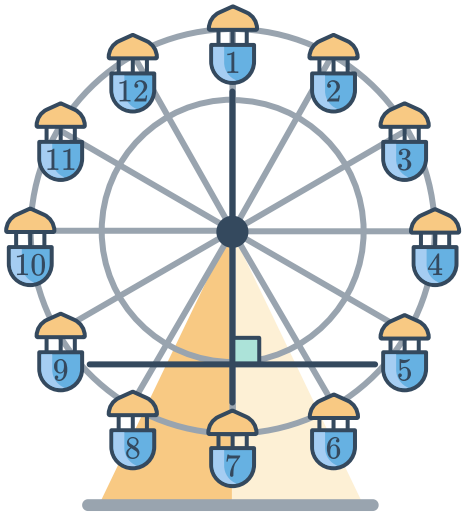

d $\angle DPC \cong \angle APB$

19 $m\angle RPQ = (8x + 16)^\circ$ and $m\angle SPT = (12x - 32)^\circ$:

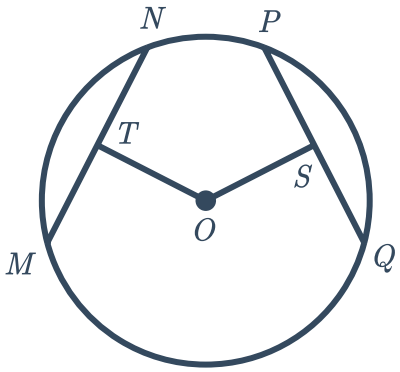

a Solve for x

b Solve for $m\angle SPT$

20 Given:

- circle O
- $\overline{MN} \cong \overline{PQ}$
- $MN = 7x + 13$
- $PQ = 10x - 8$

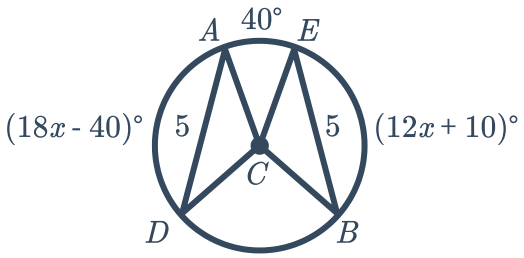

a Solve for x

b Solve for MN

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

21 Given circle C.

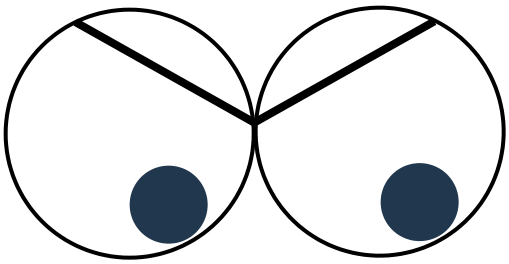

a Explain why $\angle ACD \cong \angle ECB$

b Solve for $m\overset{\frown}{AD}$

c Solve for $m\overset{\frown}{DB}$

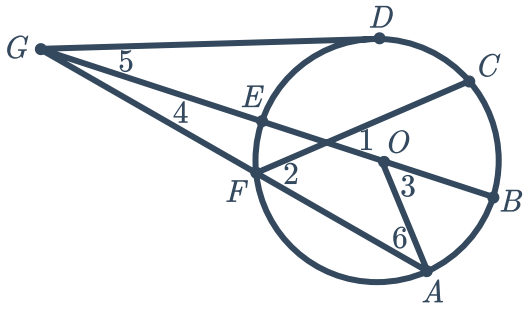

22 Ida enjoys drawing cartoon eyes consisting of two circles the same size. She has noted that when drawing angry eyes, it looks best when the eyebrows cut through the eyes so that the measure of the arc above the eyebrows are the same length. What does this mean about the length of the eyebrows?

23 Given:

- $m\angle AGB = 12^\circ$
- $m\overset{\frown}{AB} = (2x)^\circ$
- $m\overset{\frown}{EF} = 44^\circ$
- $m\overset{\frown}{CB} = (3x - 47)^\circ$
- $\overline{EB}$ is a diameter of circle O.

a Solve for x

b Solve for $m\angle 1$

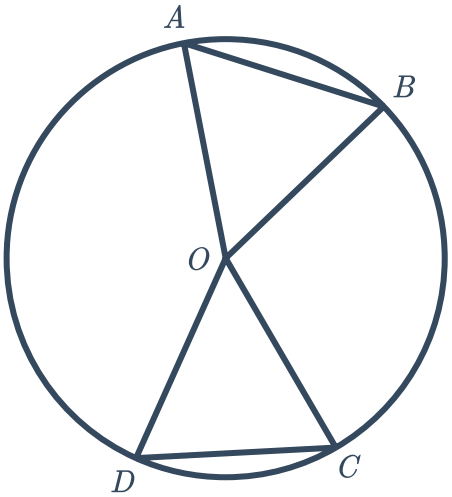

c Solve for $m\overset{\frown}{EDC}$

d Solve for $m\angle 2$

24 Given:

- circle O
- $\angle AOB \cong \angle DOC$

Prove: $\overset{\frown}{AB} \cong \overset{\frown}{DC}$

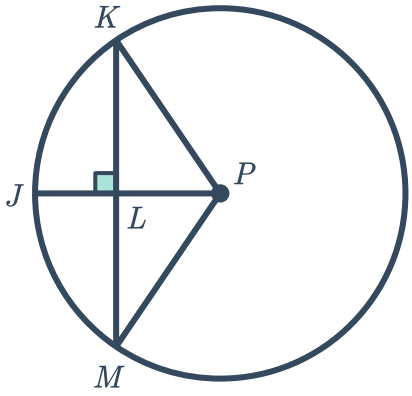

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

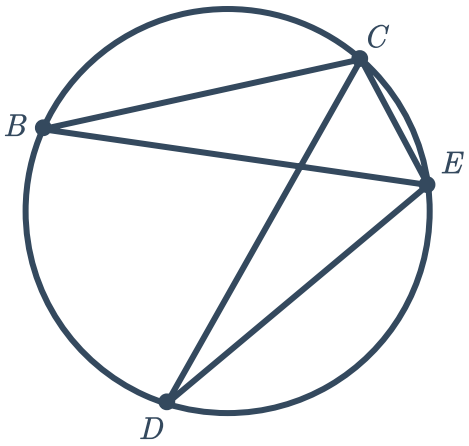

25 Given:

- circle P
- $\overline{KM} \perp \overline{JP}$

Prove: $\overline{JP}$ bisects $\overset{\frown}{KJM}$

26 If $\overset{\frown}{BC} \cong \overset{\frown}{ED}$, explain why $\overline{CD} \cong \overline{EB}$
