## Addition

**1** Calculate:

**a** $77 + 22$

**b** $810 + 180$

**c** $672 + 119$

**d** $7017 + 2906$

**e** $6347 + 332$

**f** $63423 + 1272$

**g** $55236 + 4004$

**h** $882 + 565 + 53$

**i** $676 + 235 + 46$

**j** $536 + 492 + 698$

**k** $50 + 8261 + 938 + 4394$

**l** $1635 + 84 + 249 + 9874$

**2** Four friends are picking fruit in an orchard. Kathleen picks $27$ apples, Xavier picks $25$ peaches, Ryan picks $13$ pears and Elizabeth picks $15$ plums.
How many pieces of fruit were picked in total?

**3** There are $232$ different species of fish and other wildlife at an aquarium. The aquarium has advertised the addition of $92$ new species of fish, $8$ new species of crustaceans and $9$ new species of sharks.
How many species of fish and wildlife will the aquarium be home to?

## Subtraction

**4** Calculate:

**a** $99999 - 300$

**b** $67773 - 3003$

**c** $66747 - 25332$

**d** $3662 - 43$

**e** $2519 - 146$

**f** $99447 - 7718$

**g** $83849 - 24187$

**h** $56253 - 47785$

**5** It took Gwen $137$ seconds to finish a race. John finished the race $3$ seconds quicker than Gwen, and Susana finished the race $4$ seconds quicker than John.
How many seconds did it take Susana to finish the race?

**6** Georgia has ordered $388$ large bricks for the purpose of building a brick shed. She uses $222$ bricks for the two side walls, $82$ bricks for the back wall and $54$ bricks for the front wall, leaving space for a door.
How many bricks will there be left over?

## Multiplication

**7** Calculate:

**a** $6 \times 30$ **b** $60 \times 30$ **c** $7 \times 805$ **d** $59 \times 50$

**e** $560 \times 50$ **f** $45 \times 93$ **g** $95 \times 907$ **h** $649 \times 29$

**8** We want to calculate $6 \times 608$ using an area model.

**a** Find the areas of each of the smaller rectangles, in the given area model:

**b** Using the area model, calculate $6 \times 608$.

**9** We want to calculate $50 \times 83$ using an area model.

**a** Find the areas of each of the smaller rectangles, in the given area model:

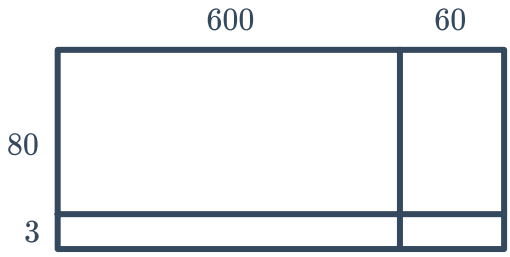

**b** Using the area model, calculate $50 \times 83$.

**10** We want to calculate $83 \times 660$ using an area model.

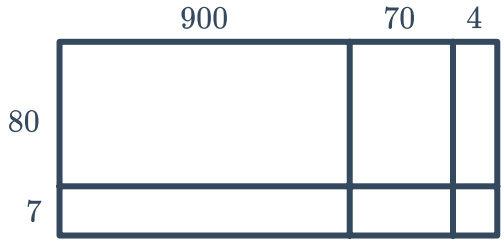

**a** Find the areas of each of the smaller rectangles, in the given area model:

**b** Using the area model, calculate $83 \times 660$.

**11** We want to calculate $87 \times 974$ using an area model.

**a** Find the areas of each of the smaller rectangles, in the given area model:

**b** Using the area model, calculate $87 \times 974$.

**12** A group of countries have decided to donate $\$3,508,060$ every year toward improving fresh water availability. How much money will the group donate over $16$ years?

## Division

**13** Calculate:

**a** $72 \div 8$ **b** $360 \div 4$ **c** $6349 \div 7$ **d** $2996 \div 4$

**e** $36300 \div 60$ **f** $1300 \div 5$ **g** $270 \div 9$ **h** $480 \div 12$

**14** Calculate:

**a** $39000 \div 65$ **b** $2655 \div 59$ **c** $31512 \div 52$ **d** $22644 \div 34$

**15** On a certain island a species of hawk sustains itself by eating the local rabbits. In the first survey of animals on the island, there were found to be $5$ rabbits for every hawk. The latest survey shows that this is still the case, but that the rabbit population has grown to $350$. How many hawks can this feed?
