Triangle congruence tests

1 For each pair of triangles, state whether the two triangles are congruent. If yes, state what congruence test they satisfy.

2 Consider the following triangles:

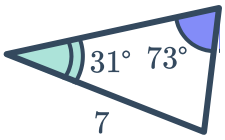

Triangle A

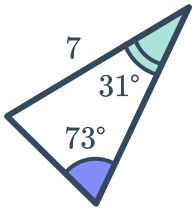

Triangle B

Triangle C

Triangle D

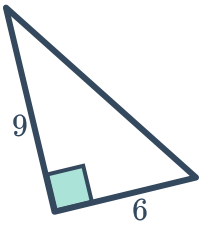

a State which two triangles are congruent.

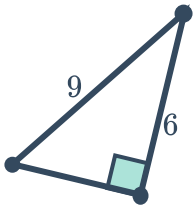

b State the congruence test this pair satisfies.

3 Consider the following triangles:

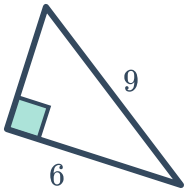

Triangle A

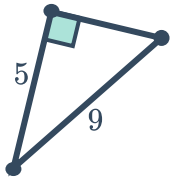

Triangle B

Triangle C

Triangle D

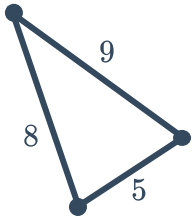

a State which two triangles are congruent.

b State the congruence test that this pair satisfies.

4 Consider the following triangles:

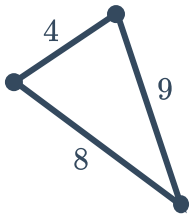

Triangle A

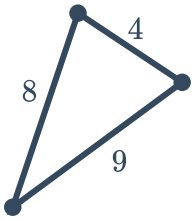

Triangle B

Triangle C

Triangle D

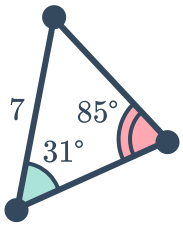

a State which two triangles are congruent.

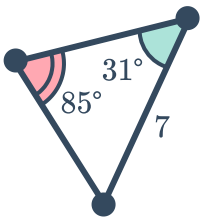

b State the congruence test that this pair satisfies.

5 Consider the following triangles:

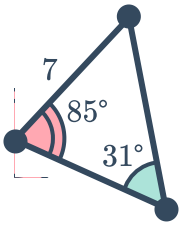

Triangle A

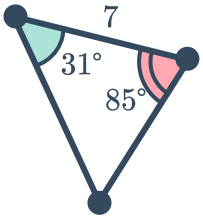

Triangle B

Triangle C

Triangle D

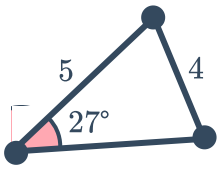

a State which two triangles are congruent.

b State the congruence test that this pair satisfies.

6 Consider the following triangles:

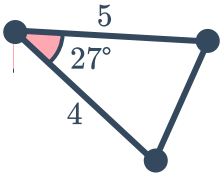

Triangle A

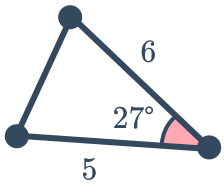

Triangle B

Triangle C

Triangle D

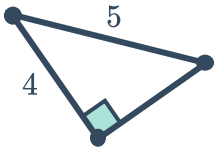

a State which two triangles are congruent.

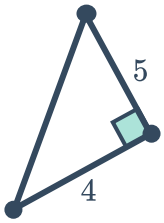

b State the congruence test that this pair satisfies.

7 Consider the following triangles:

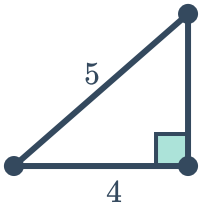

Triangle A

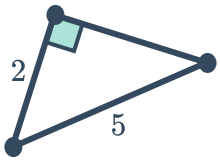

Triangle B

Triangle C

Triangle D

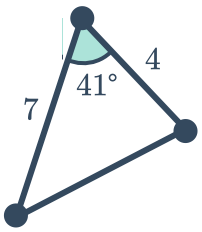

a State which two triangles are congruent.

b State the congruence test that this pair satisfies.

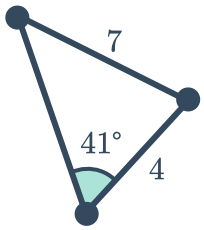

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

8 Consider the following triangles:

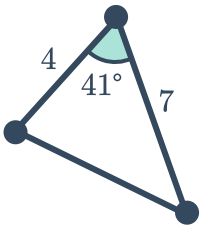

Triangle A

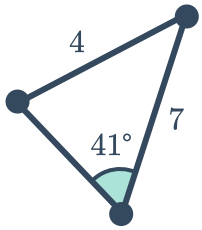

Triangle B

Triangle C

Triangle D

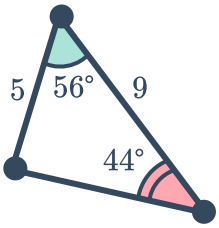

a State which two triangles are congruent.

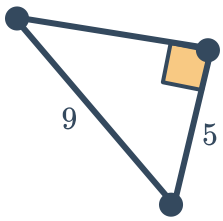

b State the congruence test that this pair satisfies.

9 Consider the following triangles:

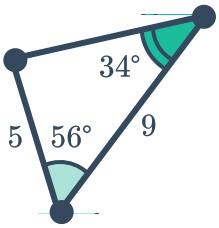

Triangle A

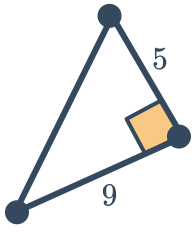

Triangle B

Triangle C

Triangle D

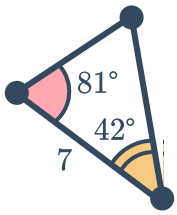

a State which two triangles are congruent.

b State the congruence test that this pair satisfies.

10 Consider the following triangles:

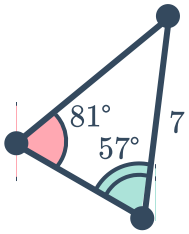

Triangle A

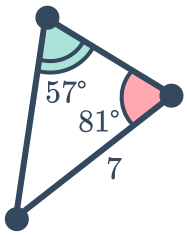

Triangle B

Triangle C

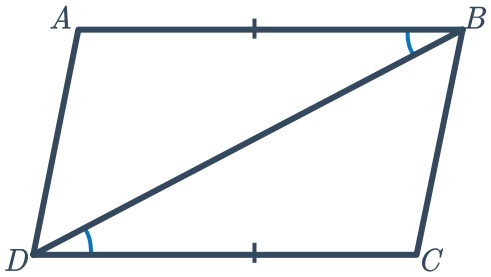

Triangle D

a State which two triangles are congruent.

b State the congruence test that this pair satisfies.

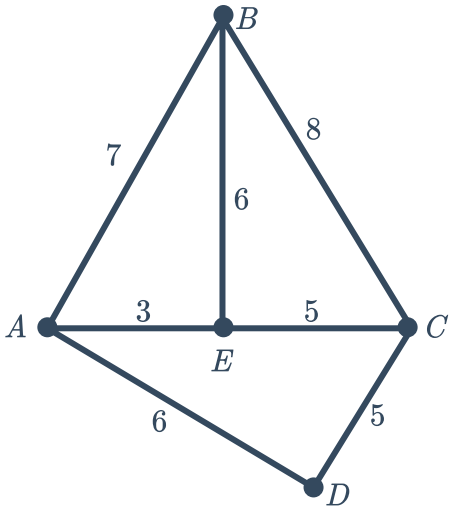

11 Consider the given diagram:
State the congruence test that triangles $\triangle ABD$ and $\triangle CDB$ satisfy.

12 Consider the given diagram:

a State which two triangles are congruent.

b State the congruence test that this pair satisfies.

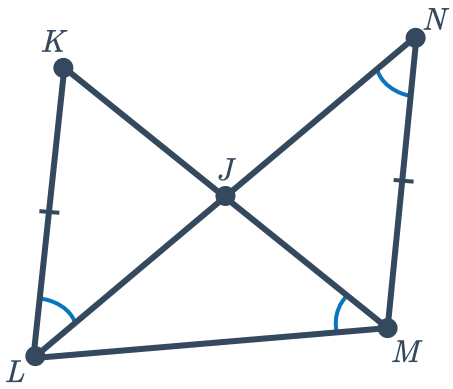

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

13 Consider the given diagram where KM and LN are straight line segments:

a State which two triangles are congruent.

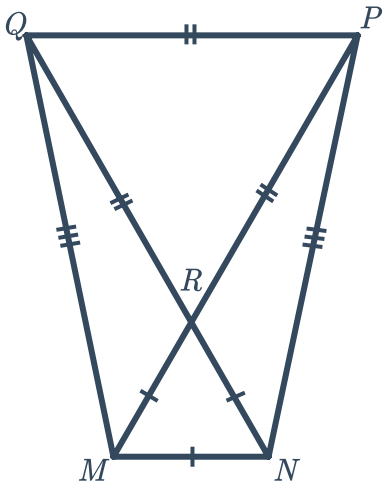

b State the congruence test that this pair satisfies.

14 Consider the given diagram:

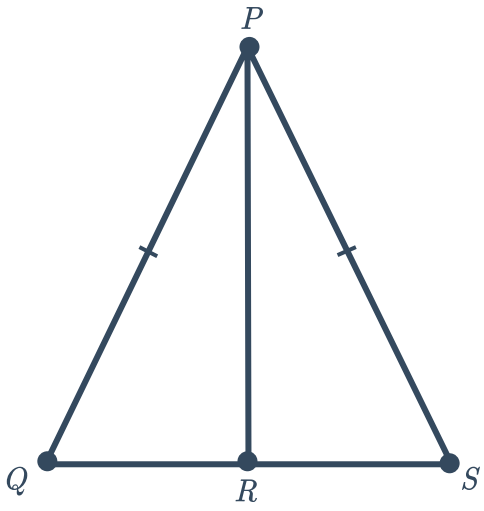

a State which two triangles that are congruent.

b State the congruence test that this pair satisfies.

15 Consider the given diagram:

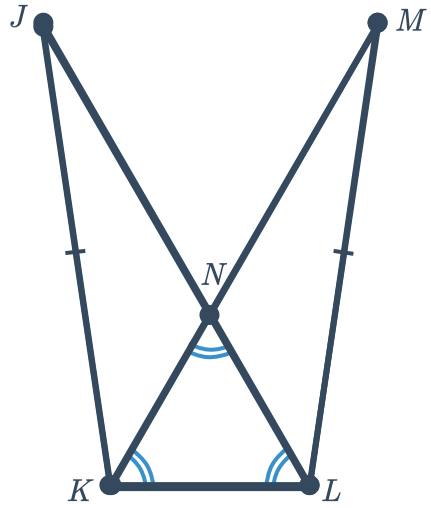

What information is needed so that the triangles $\triangle PQR$ and $\triangle PSR$ are congruent?

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

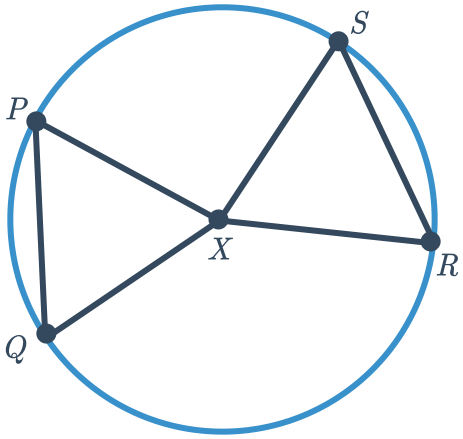

16 Consider the given diagram:

What information is needed so that the triangles $\triangle JKN$ and $\triangle MLN$ are congruent?

17 Consider the given diagram where X is the centre of the circle.

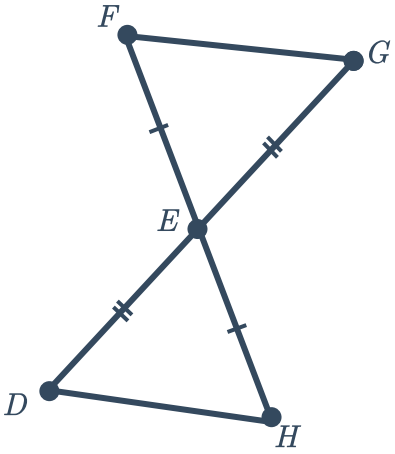

What information is needed so that the triangles $\triangle PQX$ and $\triangle RSX$ are congruent?

18 Consider the given diagram:

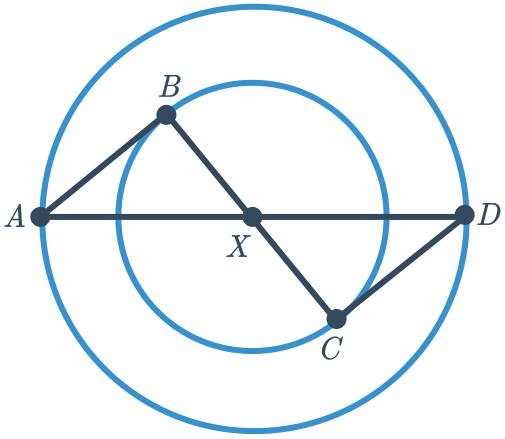

a State the congruence test that triangles $\triangle EFG$ and $\triangle EHD$ satisfy.

b State the three ways in which the triangles satisfy this congruence test.

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

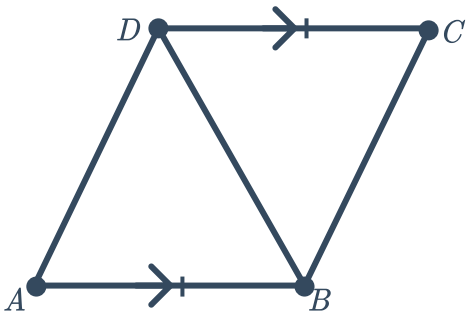

19 Consider the given diagram where X is the centre of both circles:

a State the congruence test that triangles $\triangle ABX$ and $\triangle DCX$ satisfy.

b State the three ways in which the triangles satisfy this congruence test.

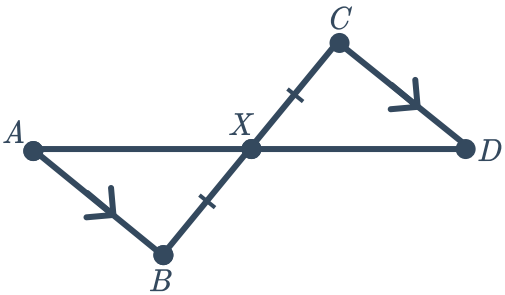

20 Consider the given diagram:

a State the congruence test that triangles $\triangle ABD$ and $\triangle CDB$ satisfy.

b State the three ways in which the triangles satisfy this congruence test.

21 Consider the given diagram:

a State the congruence test that triangles $\triangle ABX$ and $\triangle DCX$ satisfy.

b State the three ways in which the triangles satisfy this congruence test.
