Points, segments, rays and lines

1 Identify each of the following as lines, rays or segments:

a

b

c

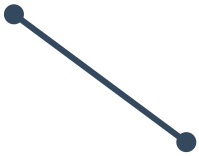

d

e

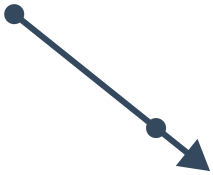

f

g

h

2 Draw the following geometric objects:

a The line through F and G.

b The segment BA.

c The ray from P through Q.

d The ray from Z through Y.

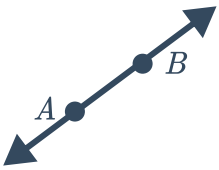

e The line through E and F.

f The segment EG.

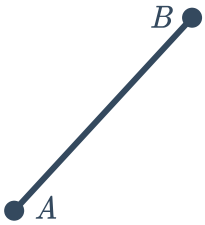

g The ray from A through B.

3 Describe each of the following geometric objects, using the points A and B:

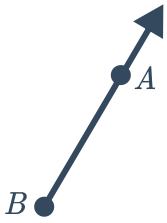

a

b

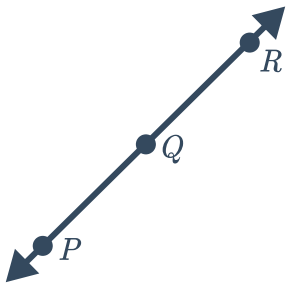

c

4 This diagram shows a line through P, Q, and R:

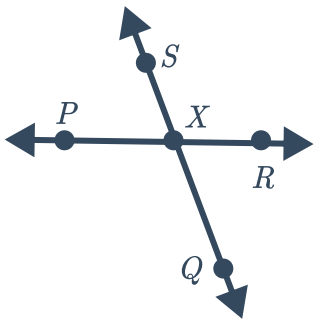

Describe a ray that is the same as the ray from P through R.

5 The following diagrams each show two lines interesecting at X:

a Describe a line that is the same as the line through X and Q.

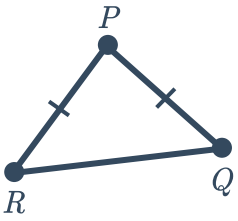

b Identify a ray that is the same as the ray from C through A.

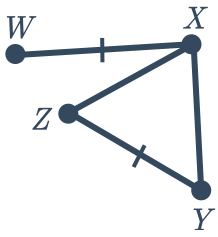

6 In the following diagrams, name the equal sides:

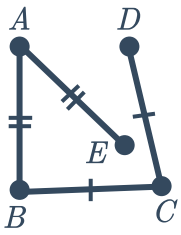

a

b

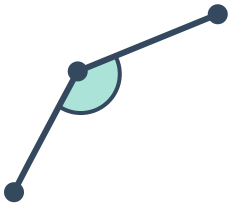

c

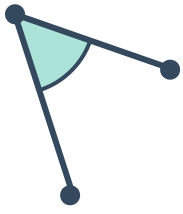

Angles

7 State whether the following are acute, obtuse or reflex angles:

a

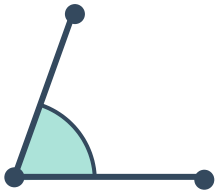

b

c

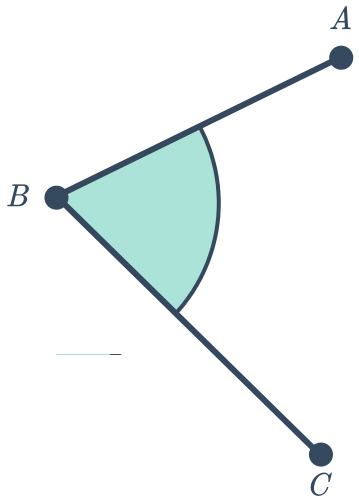

d

8 In the given diagram, the angle can be

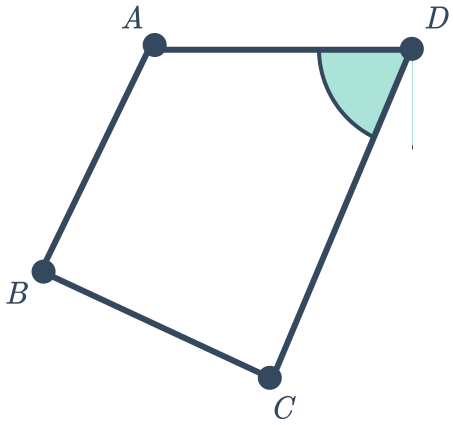

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

labelled $\angle ABC$. Write another way of labelling the same angle.

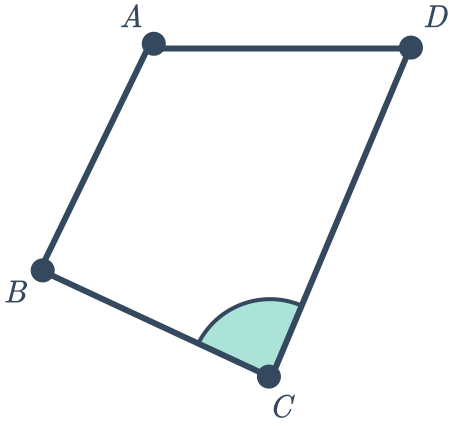

9 Name the angles that are highlighted in the following diagrams:

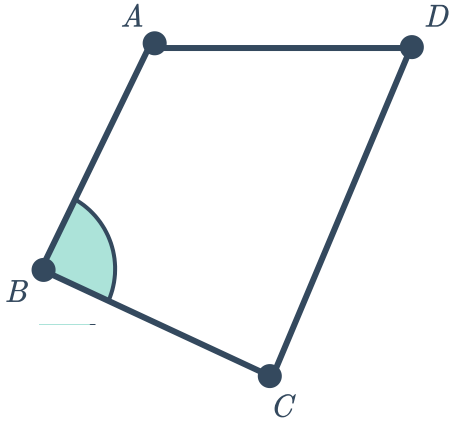

a

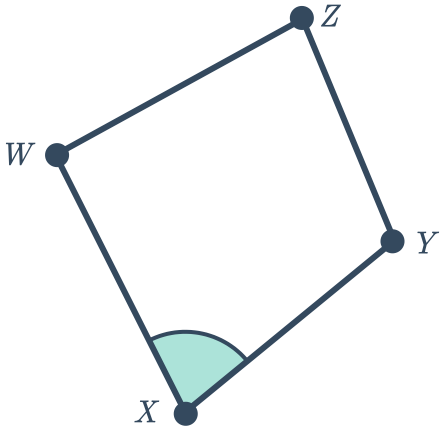

b

c

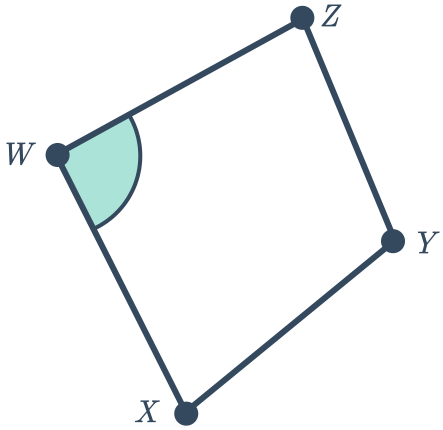

d

c

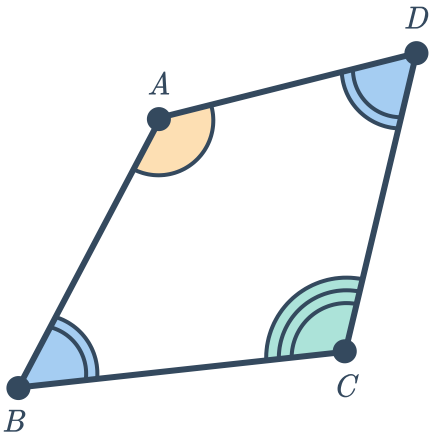

d

e

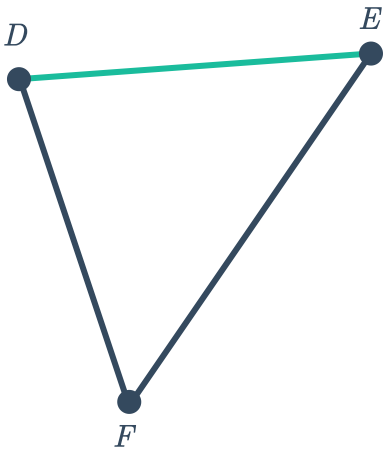

f

11 Consider the triangle $\triangle EDF$:

a Name the angle that is directly opposite the segment DE.

b Name the segment that is directly opposite the angle $\angle EDF$.
