Types of triangles

1

a Its interior angles are all acute or less than 90°.

b One of its interior angles is obtuse or more than 90°.

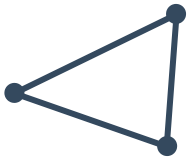

c One of its interior angles is a right angle or exactly 90°.

2

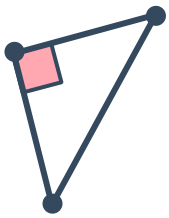

a Example answer:

b Example answer:

c Example answer:

3

a Right-angled **b** Obtuse **c** Obtuse **d** Acute

e Right-angled **f** Isosceles **g** Scalene

4

a All of its interior angles are different sizes and all its sides are different lengths.

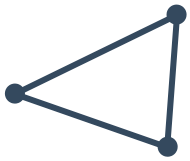

b At least two of its interior angles are the same size and at least two of its sides are the same length.

c All of its interior angles are the same size and all its sides are the same length. This implies all its interior angles are 60°. Note that an equilateral triangle is also isoceles.

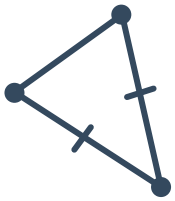

5

a Example answer:

b Example answer:

c Example answer:

6

a Isosceles **b** Scalene **c** Equilateral **d** Isosceles

e Scalene **f** Isosceles **g** Equilateral **h** Isosceles

i Isosceles **j** Isosceles

7

a Right-angled, isosceles triangle **b** Acute, isosceles triangle

c Acute, equilateral triangle **d** Obtuse, scalene triangle

e Acute, isosceles triangle **f** Right-angled, scalene triangle

g Acute, scalene triangle **h** Obtuse, isosceles triangle

Unkown angles in triangles

8

a $x = 55$ **b** $x = 40$ **c** $x = 69$ **d** $x = 56$

e $x = 67$ **f** $x = 56$ **g** $x = 49$ **h** $x = 44$

9

a

i $x = 70$ **ii** Acute, isoceles triangle

b

i $x = 110$ **ii** Obtuse, scalene triangle

© ClipSAT: By Mr. Mohamed Abdallah +966597688647

a $x = 74$

b $y = 43$
