Types of triangles

1 What makes a triangle:

a Acute? **b** Obtuse? **c** Right-angled?

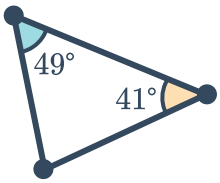

2 Draw an example of the following types of triangles:

a Obtuse triangle **b** Acute triangle

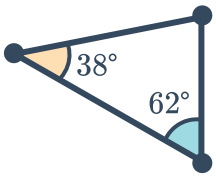

c Right-angled triangle

3 Identify the following triangles as either acute, obtuse, or right-angled:

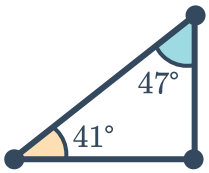

a

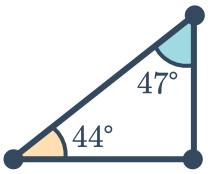

b

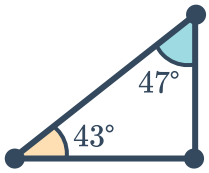

c

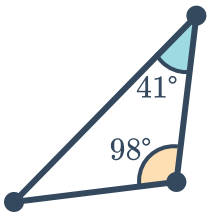

d

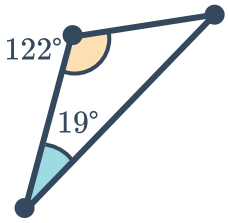

e

f

g

4 What makes a triangle:

a Scalene? **b** Isoceles? **c** Equilateral?

5 Draw an example of the following types of triangles:

a Scalene triangle **b** Isoceles triangle

c Equilateral triangle

6 Identify the following triangles as either scalene, isosceles, or equilateral:

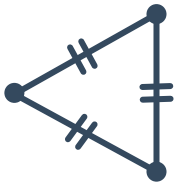

a

b

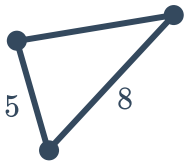

c

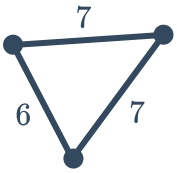

d

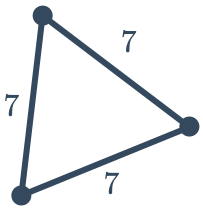

e

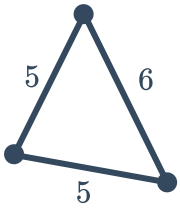

f

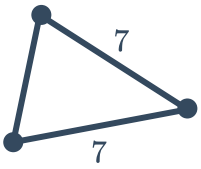

g

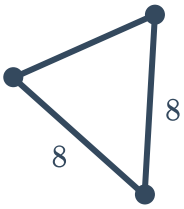

h

i

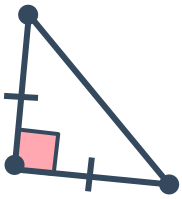

j

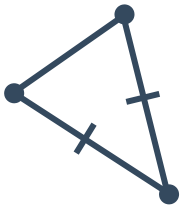

7 Categorise the following triangles in terms of the size of their angles and the relative length of their sides:

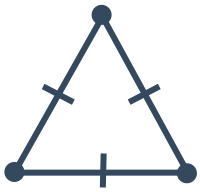

a

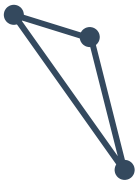

b

c

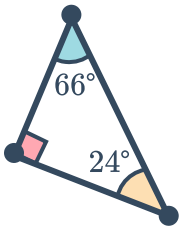

d

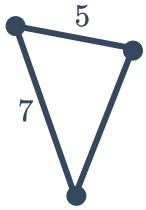

e

f

g

h

g

h

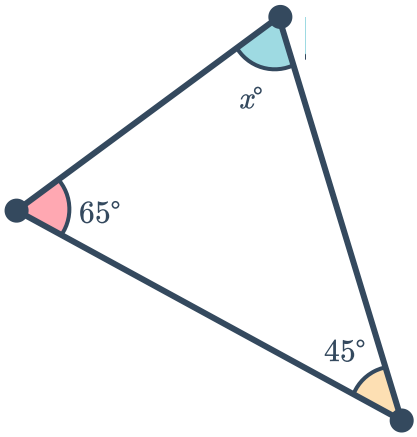

9 For the following diagrams:

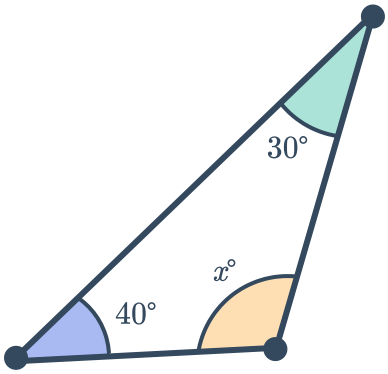

i Find the value of x.

ii Hence or otherwise, classify the triangle.

a

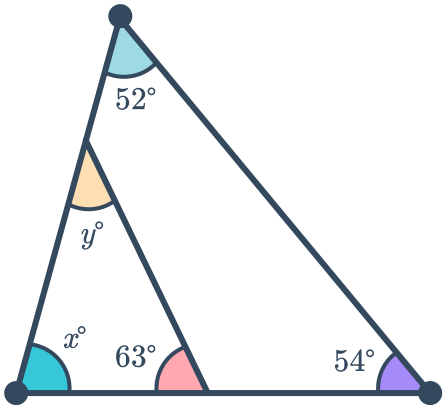

b

10 Consider the following diagram:

a Find the value of x.

b Find the value of y.
