

Gradient of a line

1 Describe the gradient of the lines in the following graphs:

a

b

c

d

2 For each of the following intervals between points A and B :

i Find the rise.

ii Find the run.

iii Find the gradient.

a $A(2, 4)$ and $B(8, 6)$

b $A(-3, 4)$ and $B(3, 16)$

c $A(-8, 4)$ and $B(-1, 18)$

d $A(-5, -2)$ and $B(-1, 10)$

e $A(-2, -1)$ and $B(2, -13)$

f $A(-1, 2)$ and $B(1, -4)$

g $A(1, 3)$ and $B(7, -3)$

h $A(-3, -2)$ and $B(5, 6)$

3 Explain why a vertical line has an undefined gradient.

4 State the gradient of any line parallel to the x -axis.

5 Find the gradient of the following lines passing through points A and B :

a

b

c

d

Gradient formula

6 Find the gradient of the interval joining $A(-9, 4)$ and $B(-3, -5)$.

7 If we have two points and the slope formula $m = \frac{y_2 - y_1}{x_2 - x_1}$, does it matter which point is (x_1, y_1) and which point is (x_2, y_2) ?
